Zero to 99% Knowledge Proficiency With ChatGPT Situation Expert

As training leaders, you understand the importance of leveling up the knowledge of your workers. But how do you effectively bring them up to speed without incurring huge training costs? At ChatGPT Situation Expert, we have conducted a case exercise called the Zero to 99% Knowledge Proficiency study to address this challenge. Through this exercise, we discovered that workers can gain funda-

mental knowledge and familiarity of a subject in just minutes, not hours or days. This means that they can have a high-level appreciation of the domain and start understanding the right questions to ask to be part of problem-solving discussions and brainstorming. What's more, this approach can significantly reduce the costs incurred by companies on requisite training and orientation.

Play the video

- Zero to 99% knowledge proficiency, familiarity
- Just minutes, not hours or days
- The right questions to ask
- Reduce the costs of leveling knowledge

“It took minutes, not hours and weeks, to learn something new.”

Kick-Start Problem-Solving With ChatGPT Situation Expert

When workers begin tackling a problem, the first step is usually to gather foundational knowledge and data related to the issue at hand. This can be a daunting and time-consuming task, but ChatGPT Situation Expert provides an efficient solution. Our experiment revealed that this tool serves as an excellent

idea kick-starter and knowledge reconstruction aid. Workers can quickly hone in on their context-specific needs, gain valuable insights from past experiences, and engage in productive, simultaneous conversations with ChatGPT that leads to richer analyses and better solutions.

757 MCDP Troubleshooting

Welcome

We have an alert on the dashboard in the MCP units.

Learners use ChatGPT Situation Expert as a kick-starter and brainstorming partner. It accelerates discoveries and recall of past and present experiences. "I knew I know this solution, but ChatGPT refreshed my memories."

- Idea kick-starter
- Context-specific answers
- Simultaneous conversations
- Richer analyses and better solutions

"I knew I know this solution, but ChatGPT refreshed my memory."

Growth Leadership Mindset With ChatGPT Situation Expert

In this experiment, we were looking for ways to introduce ChatGPT Situation Expert to aid leaders expand their growth orientation - the capacity to explore and be curious. The learning program started with a review of a case study on “giving workers more latitude” implementing their work. Learners developed a mind map of the ideas from their readings

and discussions. Then they used ChatGPT Situation Expert to have conversations with ChatGPT Situation to explore context-related stories, challenges, and opportunities to develop themselves with growth orientation. Leaders found it an accelerating experience to go beyond the walls of traditional learning, and pursue a more personal learning quest.

How to Help Workers Scale Their Capacities

In the experiement, leaders followed their curiosity to find real-life stories specific to their areas of interests. Participants said this part of the “learning is most refreshing.”

- Expand their growth orientation
- Context-related stories
- Curiosity and learning quests
- Personalized learning

“Finding my own stories is the most refreshing part of the learning.”

Conversation Coaching With ChatGPT Situation Expert

Let's take a closer look at how ChatGPT Situation Expert can accelerate conversation and self-coaching. In our workshops, we added a conversation with a self-coaching phase to the learning process, which involved three components. Firstly, learners would develop carefully crafted goals and plan out their approach. Secondly, they would engage in a conversation with ChatGPT Situation Expert. And thirdly, they would journal and share their insights.

Our learners have discovered that, although they love human coaching relationships, self-reflection done in silence and peace from non-judgmental listening ears from ChatGPT, often does the job of self-coaching. ChatGPT acts as a sounding board, reflection coach, and provocateur of ideas. Through ChatGPT Situation Expert, learners have a unique opportunity to explore their thoughts, emotions, and experiences in a safe and confidential environment.

In this experiment, learners journaled their insights in a “My Insights” form. They have conversations with ChatGPT and reflect, ruminate, and record their insights.

- Accelerate conversation and self-coaching
- Journal and share their insights
- Explore their thoughts, emotions
- Safe and confidential environment

“We love human coaches, but ChatGPT speeds up our reflections. ChatGPT becomes a sounding board. It’s non-judgmental.”

Sprint Learners and Workers With ChatGPT Situation Expert

ChatGPT is a valuable tool for training learners due to its ability to enhance the learning experience. These high-performing individuals comprise 20% of work or learning groups and are motivated seekers of knowledge, who inspire others to learn. By utilizing ChatGPT's Situation Expert, learners can conduct in-depth research on a learning objective, uncovering factual and metaphoric data and analyzing controversial issues. In turn, they report their findings

to the group, expanding their roles as learning ambassadors and current event newscasters. This valuable experience fills their curiosity and extends their knowledge base, while providing the group with insightful, engaging, and informative discussions. As training leaders, incorporating ChatGPT Situation Expert into learning activities can unlock the full potential of learners, accelerating their growth and enhancing the collective learning experience.

The screenshot shows the 'My What Ifs' interface. At the top, there's a title 'My What Ifs' with an information icon and a play button icon. Below this is a text input field labeled 'Title, Description, or Idea (optional)' with a character count 'Characters Left: 150 of 150'. Below the input field is a flowchart. On the left, a box labeled 'Situation' contains a bullet point '(Click to edit)'. Three arrows point from this box to three options on the right. Each option has a corresponding impact box. The options are: 'Option 1' with '(Click to edit)', 'Option 2' with '(Click to edit)', and 'Option 3' with '(Click to edit)'. The impacts are: 'Impact 1' with '(Click to edit)', 'Impact 2' with '(Click to edit)', and 'Impact 3' with '(Click to edit)'.

"What If Thinking" aids learners ask challenging questions. ChatGPT Situation Expert enables learners to think and apply ideas by scenarios, trial and error, beta testing, and experimentation.

- Enhance the learning experience
- Motivated seekers of knowledge
- Conduct in-depth research
- Current events newscasters

"I am a motivated seeker of knowledge. I use ChatGPT to learn more than anyone else. I did not realize this action inspires peer-learners."

Ray Jimenez, Ph.D. Architect of ChatGPT Situation Expert

Ray Jimenez, Ph.D.

Ray is the architect of Situation Expert. He is the recipient of Training Magazine's "Technology Innovation Award." He founded TrainingMagNetwork with 185,000 learning professional members. Ray is the Chief Architect of Vignettes Learning and Situation Expert. He is a prolific and popular workshop developer and facilitator of Microlearning, Story-Based Design, and Workflow Learning. He is the author of books with the same titles as the workshop. 45,000 participants have attended Ray's webinars and workshops.

As the Chief Architect of Vignettes Learning and Situation Expert, Ray has deep expertise in designing and delivering effective learning platforms and training programs that make a lasting impact. He is widely regarded as a pioneer in the field of Microlearning, Story-Based Design, Scenario-Based Learning, and Workflow Learning, and his workshops on these topics are highly sought after by organizations of all types and sizes.

What sets Ray apart from others in the industry is his ability to create engaging and immersive learning experiences that drive behavior change among learners. His

workshops and training programs are designed with a singular focus on achieving tangible outcomes, whether it be increased productivity, enhanced employee performance, or improved customer satisfaction.

Ray has authored several books on Microlearning, Story-Based Design, and Workflow Learning, which are considered seminal works in the industry. His books offer practical guidance and actionable insights that help organizations transform their training and development programs into strategic drivers of business success.
